KETLY

Smart AI Assistants for Your *Business*

Automating chats, sales, and support 24/7.
We turn conversations into profit and free up your team.

AI · AUTOMATION · 24 / 7

THE CHALLENGE

How many clients are you *losing?*

A standard sales team faces limits:

- Clients wait for hours and leave for competitors.
- Managers burn out from answering the exact same questions.
- Business stops at night and on weekends, so leads go cold.
- Human error breaks the CRM and costs you deals.

80%

of routine tasks automated by your AI employee

Your perfect *digital employee*

- Works without weekends, sick days, or vacations.
- Answers instantly, even at 3 AM.
- Has perfect discipline: always polite, never gets mad, and never forgets to log data.
- Costs a fraction of a regular employee and requires no taxes.

CAPABILITIES

What does it *actually do?*

The bot doesn't just answer questions — it gets things done:

Client Consultation

Consults clients on your services, products, and prices — around the clock, without a break.

Appointment Booking

Books appointments directly into your calendar — no human needed in the loop.

CRM Automation

Automatically creates deals in your CRM or logs data into Google Sheets.

Omni-Channel Presence

Works wherever your clients are: WhatsApp, Telegram, Instagram, Email, or a website widget.

CUSTOM LOGIC & ALGORITHMS

Built for *your* business

We don't build bots that just copy and paste text from a database. Every bot is tailor-made for your goals.

01 The bot follows an algorithm: it guides the client through the sales funnel right to the final goal.

02 Full control over the tone of voice: from strictly formal to friendly and casual.

03 It learns your company guidelines and follows them flawlessly, every single time.

FULL CONTROL & SECURITY

You always keep your *finger on the pulse*

Human Escalation

If the bot faces a complex question, it asks the client to wait and instantly calls a human manager.

Admin Panel

You see all chats in real time and can jump in seamlessly at any moment.

Dashboards

We can display any bot performance stats in a clear, easy-to-read format.

Data Security

Public AI models do not train on your clients' data. Everything stays confidential.

UNDER THE HOOD

Technical *reliability*

Why choose us over cheap bot builders? We deliver enterprise-grade reliability at a startup-friendly price.

- → We build custom architecture using **Python** — not plug-and-play SaaS tools.
- → **LangGraph**: lets us build complex, multi-step logical chains without glitches.
- → Flexible tech stack: primary setup on **Google Cloud + Gemini**. Easily adapt to any AI model or cloud platform based on your specific needs.
- → **Stable performance under any load** with no system crashes.

TIMELINE & WORKFLOW

From idea to launch in *2–3 weeks*

It takes about 2 to 3 weeks from an idea to a fully launched product, tested on real conversations.

BRIEF

Knowledge Base

We gather your knowledge base and deeply understand your business, clients, and goals.

WEEK 1

MVP + Integrations

We build the core version and set up all integrations. The bot is ready to work.

WEEKS 2–3

Testing & Polish

Active testing on real conversations. We find blind spots and polish the algorithm to perfection.

TRANSPARENT PRICING

An investment that *pays off quickly*

DEVELOPMENT & SETUP

Start from

$2,500

One-time fee

A fully finished product, ready to deploy.

- Custom algorithm & sales funnel design
- All platform integrations (CRM, calendar, etc.)
- Full testing & launch support included
- You own the source code

MONTHLY MAINTENANCE

~$200

per month

Bot runs 24/7 with zero additional overhead.

- Google Cloud infrastructure
- AI model API usage (Gemini)
- 24/7 uptime monitoring
- Minor adjustments & bug fixes

ROI VS. HIRING

A full-time digital employee that costs *way less* than a human salary — same coverage, fraction of the cost.

AI STACK / YEAR	VS	EMPLOYEE / YEAR
~$4,900		$36,000+

- No payroll taxes, benefits, or HR overhead
- Instant scaling: handle spikes without hiring rounds
- 24/7 coverage with zero shift planning
- Predictable monthly burn after the one-time build

No sick days. No vacation payouts. No recruiting fees — just a system that ships.

THE BASE PACKAGE

What's included in the *$2,500* setup?

This is our core package. It includes everything you need for a successful launch with strict, transparent limits.

1 Communication Channel

Choose one primary platform where your bot will live: WhatsApp, Telegram, or website chat.

1 Main Workflow (up to 5 steps)

A single, clear path to guide your client to the goal.

Example:
Greeting → Service selection → Date & time booking → Contact collection → Confirmation.

1 Data Integration: Sheets or CRM

Direct data sync with either Google Sheets or one specific CRM.

Structured Knowledge Base

Core company info, basic FAQs, plus up to 20 items (services or products) across 5 categories.

Admin Control Panel

A convenient Telegram-based panel to monitor chats and take over manually at any time.

+ Need more?

EXTENDABLE

Need multiple channels, complex multi-branch logic, or a massive product catalog? We can easily scale this up with a custom package.

READY TO START?

See it for yourself

Chat with our AI assistant right now.

Visit our website and ask our live bot anything about our work.
It will gladly tell you about our tech and successful cases.
